> Hi Billy, Thank you for the heads up. I hope you had a great weekend and I
hope your fearless leader made it safely back home. I have Curyung on my list
of tribes that have requested consultation and I have you designated as my
point of contact. In regards to the Intergovernmental Technical Review Team,
even though I know all of you, it would help if you would include the
information below with the nominations from Curyung. Since I will be on annual
leave April 11-25, I would ask that you send the information directly to Rick
Parkin. Please confirm that the nominees either work for a Tribal Government
or have been officially designated to represent their tribal government for
this effort? Please also include a short write-up for each person, describing
their background, experience, education, employment and any other information
that provides the basis for their knowledge of the fish resources in Bristol

Bay and the ecological factors that support the fishery. If Curyung decides to

nominate any Elders please include that information as well. I understand the three of you are not quite "elders" - but maybe "elders in training." :) If you would like to talk further about the purpose of the intergovernmental technical team or my expectations about the role team members will play, please contact Rick Parkin at 206-553-8574. Also for now I guess I am the contact person for the process. We do want to be involved, of course, in the consultation process from the beginning and throughout. As soon as I can catch up to Tom, I will get his signature on the forms and send them to you. Thanks for your help in this critical matter and

have a great week-end.
